UW-18

TELEPHONE INTERFACE

ude

Version 6.0A compatible with v2-4.0 UC-102 version or higher

Nurse Call System **udeCOM**

1. VOX CONTROL ADJUSTMENT
2. AUDIO VOLUME
3. AUDIO MESSAGE VOLUME
4. MICROPHONE VOLUME
5. DISPLAY LCD
6. RESET
7. TECHNICAL MODE SOCKET
8. UW-102 PLUG (RIBBON CABLE)
9. TELEPHONE ANALOG JACK (RJ11)
10. TELEPHONE ANALOG CONNECTOR (EUROBLOCK)
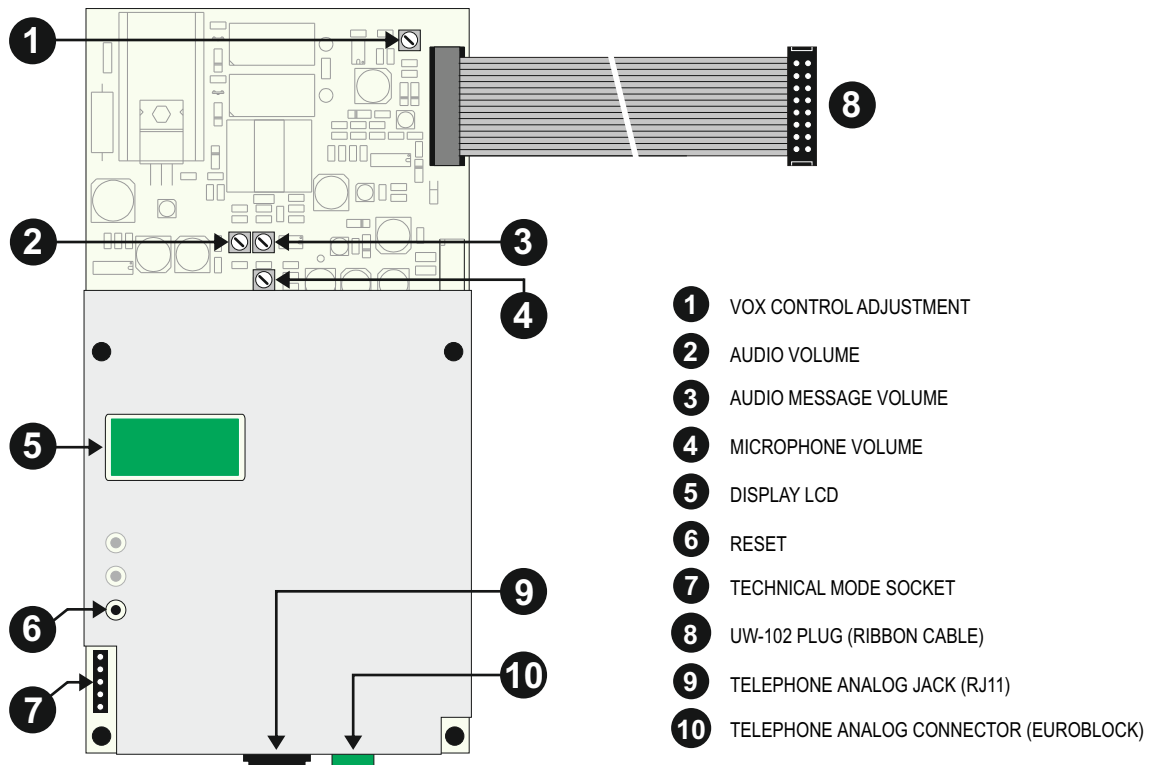

CHARACTERISTICS

The UW-18 allows the intercom audio connection between UC-104 (room substation) and a telephone. The system will provide the bedroom number, floor and type of call through an audio message. This interface can be connected to a PABX or just a wireless analog station phone.

CONFIGURATION:

Plug and play

Once installed the phone interface (UW-18) and plugged to the UW-102 it will work completely automatic.

Phone connection

- Insert the plug of the telephone cord into the jack input (click into the place) or connect to the euroblock terminal.
- Place the cord in cable duct.
- Insert telephone jack into telephone socket.

Audio adjustments:

The UW-18 has an audio factory configuration. You can adjust the intercommunication volumes (phone loudspeaker and microphone) and the system audio message volume.

1. Choose the potentiometer you want to adjust
2. Tune the required level.

Display messages

Anytime the display shows the operating state of the UW-18 like attending calls, playing audio message, etc.
This information is only for technical staff and can give information of the system.

If you connect the associated telephone interface to a digital central station, an analog-digital adapter is mandatory.
