

Full-Duplex equipment for BANKS AND ARMORED GLASS

STOP COVID-19

Bi-directional communication equipment specially designed to be used in interior bank tellers and service desks with separation glass, that could be even armored.

It allows to put a physical protection barrier between the entity's staff and customers.

Adaptable to any type of window, glass or partition.

Product reference: IV-5/K

UDE's Full-Duplex hands-free communication system **prevents the spread of COVID-19** or any other infection through air or contact.

It adapts to any type of internal bank tellers or service desks with **any type of protection glass or partition screen, whether or not armored.**

The UDE system for banks and armored glass is **very easy to install.**

The system **allows fluent and highly intelligible communication** between the entity's staff and customers.

The internal and external microphones are **easily disinfectable.**

The system allows to optionally incorporate a small **induction loop** on the side of customers **to favor and improve the communication experience of people with hearing disabilities** and who wear a hearing aid on "T" position.
