

Full-duplex equipment for HOSPITALS: Receptions, Emergencies, ICU, CCU, ETC.

STOP COVID-19

Bi-directional communication equipment specially designed for hospitals sector.

It allows to put a physical barrier of protection between healthcare personnel, patients and visitors.

Valid for general and emergency receptions, ICUs, CCUs, isolation rooms, etc.

Adaptable to any type of window, glass or partition.

Product reference: I V-5/K

UDE's Full-Duplex hands-free communication system **prevents the spread of COVID-19** or any other infection through air or contact. Especially indicated for **general receptions, emergency receptions, ICU and CCU isolation rooms.**

It adapts to **any type of protection glass or partition screen, whether or not secured.**

The UDE system for Hospital sector is **very easy to install.**

The system **allows fluent and highly intelligible communication** between healthcare personnel and patients or visitors, and between patients and family visitors.

The internal and external microphones are **easily disinfectable.**

The system allows to optionally incorporate a small **induction loop** on the side of visitors, **to favor and improve the communication experience of people with hearing disabilities** and who wear a hearing aid on "T" position.
