

Full-duplex equipment for ELDERLY HOMES

STOP COVID-19

Bi-directional communication equipment specially designed for use at Elderly homes and residencies.

It allows to put a physical protection barrier between the residents of elderly homes and their visitors and family members.

Adaptable to any type of window, glass or partition.

Product reference: IV-5/R

UDE's Full-Duplex hands-free communication system **prevents the spread of COVID-19** or any other infection through air or contact.

It adapts to **any type window, protection glass or partition screen.**

The UDE system for Elderly homes is **very easy to install.**

The system **allows fluent and highly intelligible communication** between health staff and patients or visitors, and between patients and family visits.

The internal and external microphones are **easily disinfectable.**

The system allows to optionally incorporate a small **induction loop** on both sides, as for the residents of elderly homes as well for the visitors/family members side **to favor and improve the communication experience of people with hearing disabilities** and who wear a hearing aid on "T" position.
