

The PZ-36 desk microphone incorporates a pre-warning chime and a digital recorder/player.

Its functions are:

- ☑ Broadcasting of loud announcements, with or without pre-warning.
- ☑ Repetition of announcements (digital reproduction).
- ☑ Broadcasting of pre-recorded announcements.

- Unidirectional electret microphone	
- Signal input:	Balanced.
- Impedance:	600Ω.
- Chime:	3 tones / 2 selectable tones.
- Power supply:	12 to 24 VDC.
- Sensibility:	-67 dB (0 dB = 1 V / μBar).
- Frequency range:	150 Hz to 10 kHz.
- Max. recording time:	60 seconds.
- Material:	Metal / Plastic.
- Colour:	Anthracite grey.
- Connection*:	DIN connector.
- Cable length:	3 metres.
- Weight:	460 grams.

PZ-36 with optional DIN connector (on request)

Gooseneck length: 300 mm.

Description

PZ-36 Microphone console with digital message player / recorder allows:

- Broadcasting facilities of announcements with or without preannouncement chime.
- Record announcements up to 60 seconds on non volatile memory (saved even if power supply is disconnected).
- Remote control the broadcast of pre-recorded message thanks to push button "Reproduction".
- Remote control the broadcast of pre-recorded message thanks to an external contact (normal closed) for emergency applications.
- Monitor the messages thanks to a monitoring loudspeaker built-in.

As well, it is possible to modify configurations thanks to internal jumpers, following modes are available:

1. Announcements without chime.

2. Announcements with chime (2 tones or 3 tones).

3. Automatic recording of last announcement broadcasted.

This function called "Repetition" allows to broadcast again the last announcement which have been done, several times if required, by activation on a push button.

4. Selective recording.

Recording is available only if the 2 push-buttons are activated at the same time.

5. Recording saved.

Thanks to an internal jumper, the recorded message is saved.

6. Connection or disconnection of monitoring loudspeaker.

- ① - Microphone capsule
- ② - Microphone gooseneck
- ③ - **SPEAK** Pushbutton
- ④ - **SPEAK** LED indicator(green)
- ⑤ - **PLAY** Pushbutton
- ⑥ - **RECORDING NOT VALID** LED indicator (red)
(excess of duration)
- ⑦ - Monitor speaker

Installation

PZ-36 microphone console is delivered from factory with following configuration: reproduction mode (mode 1) with 3 tones chime, with preannouncement level adjusted, with power supply from the amplifier. If necessary, proceed as follow:

1. Configuration of PZ-36 microphone console by removing the back cover and select jumpers according with the requirements (see fig. 1 and 1B).
2. Connect power supply according with the requirements:
 - A. From the amplifier thanks to connection cord CA-36. Optional with DIN Connector version (see fig. 4).
 - B. From external power supply DC 12V up to 24V. Supplied with PZ-36 (see fig. 2 and 3).
3. Supply the system and check that operation is ok. Adjust chime and pre-recorded message levels, if necessary.
4. Refit the back cover.

Operation

1. Repetition mode – Mode 1

Press the push button “speech”, when the green lamp is “ON”, broadcast the message thanks to the microphone.

2. Selective recording mode – Mode 2

In order to record a message in selective mode, you have to press simultaneously the 2 push buttons. You can speak on the microphone when green lamp is “ON”.

When the 2 push buttons are depressed, the recording is completed.

In order to broadcast the recorded message, press push button “reproduction”.

In order to broadcast announcements press push-button “speech” and speak when green lamp is “ON”. Depress the push button when announcement is completed. This message is not recorded.

3. Saved messages – Mode 3

Record the message using microphone console with configuration mode 1, press push button “speech” and proceed as described in mode 1.

Then, proceed as follow:

- Disconnect the power supply
- Remove the back cover
- Remove the jumper A and connect jumper B
- Refit the back cover
- Connect the power supply
- Broadcast the pre-recorder message thanks to push button “reproduction”
- In order to broadcast normal announcements proceed as usual. The announcements will be broadcasted to the Public Address system but will not be recorded. The pre-recorded message is saved and cannot be erase.

4. Erase the pre-recorded message

- Configuration of microphone PZ-36 in mode 1
- Press push button “speech”

NOTES

1. When a message is recorded, at the same time, it is broadcasted on the public address system. In same case, it may be possible to cancel the broadcasting of this message during the recording process, thanks to amplifier input potentiometer selected in position “0”.
2. Recording level is automatically adjusted.
3. If “reproduction” push button is pressed permanently and if at the same time, the amplifier input is activated, the message will be repeated.
4. If recording duration (60 seconds) is overpass, a red lamp is “ON”. The message is not totally recorded.
5. Voice announcement from microphone has always priority over pre-recorded message.

Recommendation:

Between terminals 9 and 10 of microphone, one end of line resistance is connected (RFL= 4K7 / 1W). This allows to the security central unit to detect the disconnection of the microphone console.
