

# WV-10

Audio induction loop

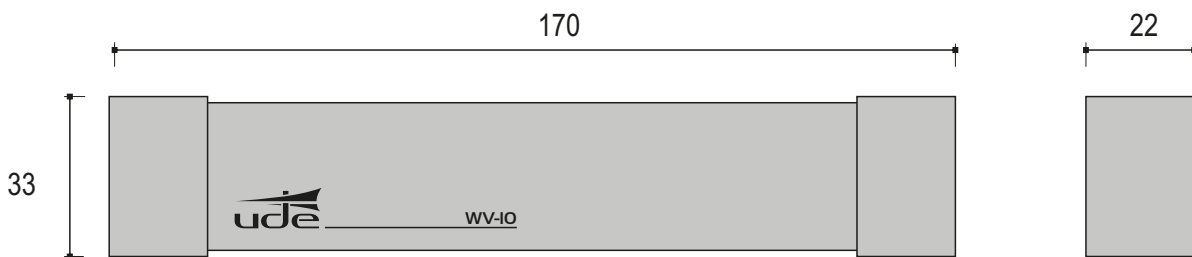

## Description

Induction loop for hearing aids with "T" position, specially designed to be used in conjunction with the **UDE Duplex Window Intercom units IV-6/M and IV-5/M, LI-5/K and LI-7/K.**

The **WV-10** is placed on the outside of the window, creating a small magnetic field which is sufficient for the sound to be transmitted to the hearing aid clearly, free of disturbances and ambient noise that could cause confusion to the listener.

Adjustment is simple and quick when connected to UDE Duplex Window Intercom equipment.

Typical places where the WV-10 can be installed are sales offices, information points, secure customer service areas, etc.
