

A photograph of a modern reception desk in an educational center. The desk is made of light-colored wood and is separated from the rest of the room by a glass partition. Behind the desk, there are several computer workstations with monitors and keyboards. A potted plant is visible on the desk. The background shows a bright, well-lit room with large windows.

Full-duplex equipment for receptions in EDUCATIONAL CENTERS

STOP COVID-19

Two-way communication equipment specially designed for use in school reception facilities.

It allows to put a physical barrier of protection between the staff of the center and the students and visitors.

Adaptable to any type of window, protection glass or partition.

Product reference: IV-5/K

UDE's Full-Duplex hands-free communication system **prevents the spread of COVID-19** or any other infection through air or contact.

It adapts to **any type of window, protection glass or partition.**

The UDE system for educational centers is very **easy to install.**

The system **allows fluent and highly intelligible communication** between the center's reception staff and students or external visitors.

The internal and external microphones are **easily disinfectable.**

The system allows to optionally incorporate a **small induction loop** on the side of the student or external visitors, **to favor and improve the communication experience of people with hearing disabilities** and who wear a hearing aid on "T" position.
